*Everything starts  
with an idea.*

However, if the idea just stays on paper, it remains an idea.

*So, we decided to turn  
our ideas into reality.*

## More than 50 years of history

- 1959 The Company is founded by Mr. Alexandros Bakatselos. The first workshop covers an area of 110 sq. m.
- 1962 The production of metal-frame furniture commences. The facilities cover an area of 4,500 sq. m.
- 1968 The production of stainless steel sinks commences.
- 1969 First export shipment is dispatched. Destination: Italy.
- 1974 The Company moves to its current location. Current facilities cover an area of 286,000 sq. m.
- 1977 The production of cookware commences.
- 1997 The production line for monoblock sinks installed.
- 1999-2008 Subsidiaries are established in Poland, Germany, United Kingdom, Romania, Russia, Bulgaria, Italy, U.A.E. and India.
- 2000- PRESENT Investments of more than € 48 million in state of the art robotics and automated equipment.
- 2009 **Pyramis celebrates its 50th anniversary.**
- 2010 Based on the strategic aims of the shareholders for continuous expansion in different markets and providing maximum satisfaction to it's customers, Pyramis invests about € 1 million in a new production unit, an automatic polyurethane injection system.
- 2011 Recognized by ICAP as one of the "Strongest Companies in Greece".

## PYRAMIS PRODUCT PORTFOLIO

With more than 50 years of history in the kitchen industry, Pyramis offers one of the most extensive ranges of products: a wide collection of sinks, taps and electrical appliances, especially designed to be the focal point of any kitchen by combining practical features with stunning visual impact. The redesign of the Pyramis cookware collection compliments the Pyramis proposition for the kitchen.

### KITCHEN FITTINGS

- Stainless Steel Sinks
- Pyragranite Sinks
- Kitchen Taps

### KITCHEN APPLIANCES

- Cookerhoods
- Hobs
- Ovens
- Microwave Ovens
- Dishwashers
- Refrigerators

### PROJECT FITTINGS & APPLIANCES

- Pantries
- Minikitchens
- Drip Trays

### COOKWARE

- S. Steel Pots & Pans
- Aluminum Pots & Pans
- Ceramic Pots & Pans
- Kitchen Accessories

### BATHROOM FITTINGS & APPLIANCES

- Bathtubs
- Waterheaters
- Bathroom Taps
- Hydro & Air Massage Systems
- Solar Systems
- S. Steel Washbasins

*The reality turned out to be a success and gave rise to many more wonderful ideas.*

## QUALITY AND ENVIRONMENT

### Product quality

Pyramis has always viewed quality as one of its priorities. The company is dedicated to providing the outmost quality and excellence in all its products and services which meet or exceed the expectations of its customers. Thanks to these essential factors Pyramis has gained its competitive edge. Every Pyramis product features **CE certification**.

### Environmental system

With the same philosophy as for its quality system, Pyramis is dedicated to the protection of the environment and therefore is certified according to both **EMAS and ISO 14001 environmental certificates**. The EMAS certification is voluntary and highlights the company's commitment to ecological preservation. The environment is a fundamental concern for Pyramis and a key component of its planning strategies. This transcends all business areas and ensures that the manufacturing methods and products are all environmentally friendly. Pyramis is committed to providing its customers with the highest possible satisfaction, including taking effective action for the protection of the natural world.

### Quality system

Pyramis acknowledges that supplying quality products means focusing only on reliable materials and timeless design, so that the price of the product reflects its **true value**. Pyramis adopts a vast range of performance indicators, at every company level, to ensure that the product delivered to the user meets all his expectations. Pyramis is **ISO 9001 certified**, ensuring high standards of quality for its products and processes, while at the same time focusing on the protection of its coworkers' health and safety, and is thus **OHSAS 18001 certified**.

### Strongest Companies in Greece

Pyramis has been assessed by **ICAP Group** as one of the "Strongest Companies in Greece". This important acknowledgement verifies our creditworthiness and links us to the most powerful enterprises in Greece, which are ready to face the challenges of our times. The "Strongest Companies in Greece" is a community of enterprises that are ranked at the highest Credit Ratings of **ICAP Group**. **ICAP Group** is recognized by the Bank of Greece as an External Credit Assessment Institution and by the European Central Bank as an Accepted Rating Tool Source.

## TECHNOLOGY AND AUTOMATION

The "Pyramis manufacturing process" incorporates technology, automation, and high production capacity. It includes a wide range of production equipment including presses, laser machines, welding robots, and automatic welding and folding machines. All machinery is maintained in excellent condition to ensure continuous and consistent production.

Automation in combination with our highly skilled employees provide for an annual production volume of more than 1,500,000 sinks, while our intelligent logistics system meets the total needs of our customers worldwide.

*The ideas were rewarded  
and the reality reflected even more growth.*

## PYRAMIS WORLDWIDE

Today, Pyramis brand enjoys prestige and credibility all over the world. The company exports its products to more than 65 countries in all continents. Furthermore, an efficient exports salesnetwork of 9 company owned subsidiaries has been established. Targeted and effective distribution and organisational network, product development in compliance with the needs and requirements of different cultures, as well as communication strategies aiming at full recognition of the brand and its corporate benefits have been used to achieve growing success in international markets.

*As the ideas grew, the reality  
looked further afield  
and became global.*

## PYRAMIS, a company of the future

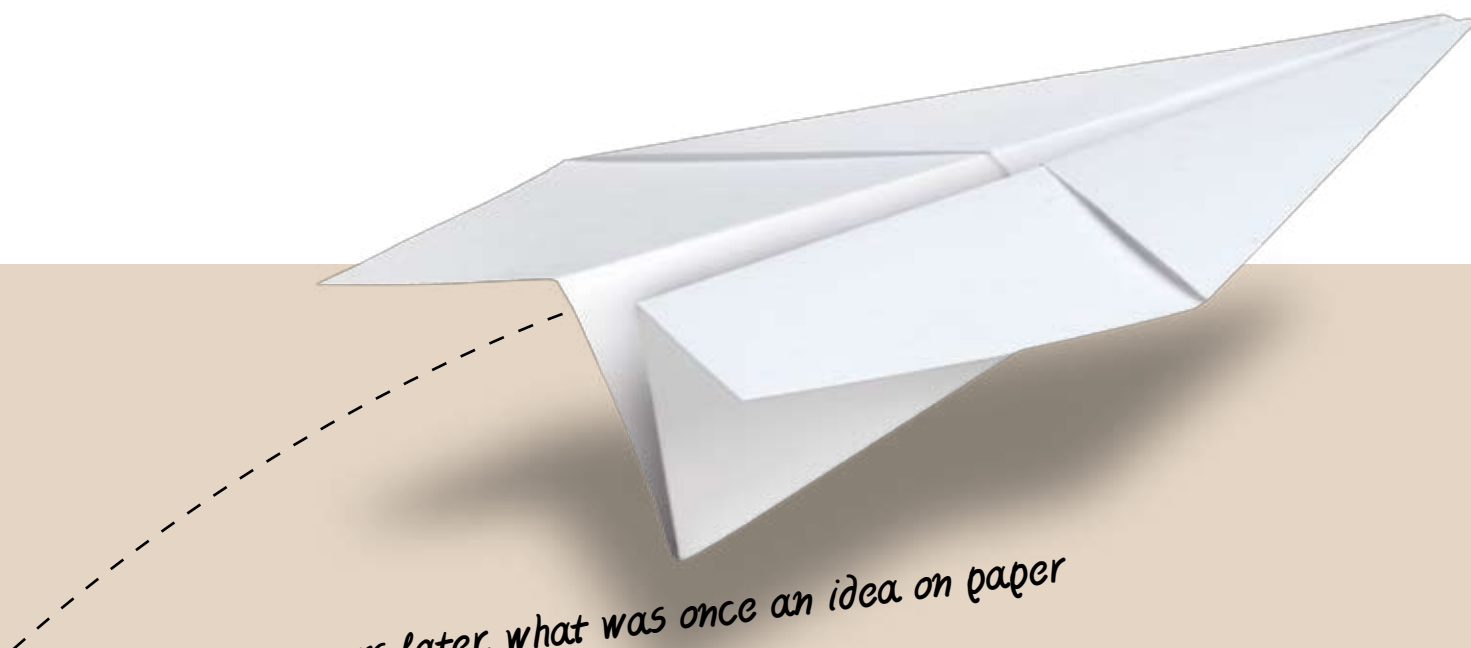

Pyramis is a modern, well structure and dynamic multinational company, remaining under the same ownership and leadership that set the business up 50 years ago. Since, 1959, the year that Pyramis was founded, the world has changed; however some things still remain the same.

Pyramis values prove to be timeless:

- *Honesty*
- *Integrity*
- *Reliability*
- *Teamwork*
- *Commitment to the fulfilment of corporate goals and priorities*
- *Responsibility*
- *Professionalism - Effectiveness*
- *Acknowledgment and Rewarding of individual and group effort*
- *Extending our Knowledge base*
- *Self-awareness and Self-criticism*

### **+1 Passion for our work**

Our core principle that everything can be further improved is the starting point of all our actions. Because, after all, what we have to offer is more than kitchen and bathroom products: it is the dream that our lives and our world can become better. This will be the source of power and success for Pyramis in the next 50 years!

*More than 50 years later, what was once an idea on paper  
has now become a definite reality -  
a big business with a bright future.  
It's amazing what you can do with an idea.....*

# Stainless Steel Sinks

## Stainless steel finish

A variety of stainless steel finishes includes brushed steel, smooth, linen and microlinen.

## Article number

The PYRAMIS nine digits article number designates a particular sink, with its own unique specifications and packaging.

SMOOTH	107146730	2 Tap Holes	Ø92mm	1 Item/Carton Box
--------	-----------	-------------	-------	-------------------

## Bowl position

The left or right hand position of the bowl in an installed sink defines the sink as left hand or right hand. In the case of two-bowl sinks with one large and one smaller bowl, the position of the larger bowl defines the sink as a left or right hand.

## Tap hole(s)

**1+1 Tap holes:** The sink can be installed in reverse, and be either a left or right hand bowl. The tap hole located at the back of the sink, is for the tap installation, whilst the second tap hole at the front can be covered with a tap hole cover, or can be used for the installation of an automatic waste valve. (Pop-up waste valve).

**1 Tap hole:** Indicates that a sink is offered with one tap hole for the installation of the tap, and the position of the bowl defines the sink as either right or left hand.

**2 Tap holes:** They are the one next to the other, which means that the sink is not reversible. The one aperture is for the tap and the other will normally be used for a soap dispenser or an automatic waste valve (pop-up waste valve). Alternatively the 2 tap holes can be used for bridge-type taps or 2 separate taps.

## Waste valves

The number used to define the type of waste valve is the diameter of the outflow. Sinks are available with 52mm, 60mm, 92mm diameter or square outflow (depending on the model).

## Overflow

All PYRAMIS sinks have overflow to protect from water flooding. The overflow can be either in the bowl or on the drainer of the sink.

## Packaging

There are two different types of packaging, either in a carton box or in a sleeve. Carton boxes could include the waste valve, siphon and in some cases accessory/ies suitable to the packed sink. Sleeve packaging includes only the sink, and the suitable waste valve(s) and siphon should be ordered separately.

## Waste valves & siphons

Within the catalogue presentation of an individual sink model, you can find the drawing of the suitable waste valve and siphon according to the specifications of the codes that appear. PYRAMIS provides both regular and space saver siphons, as well as manual and pop up waste valves. You can check for the suitable waste kit in the tables of pages 144-150.

## Installation

### Cut Out Drawing

Is a detailed guide which helps the accurate cutting of the worktop. It includes the cutout length, width and corner radius of the relevant model for Inset, Undermount or Flushmount fitting.

### Siphon Installation Drawing

Gives you detailed information and measurements about how the space under the sink looks like after the installation of the siphon.

### Installation Profile

Illustrates, according to the different installation types, the way that the sink sits on the worktop.

## Installation Types

### Inset

The rim of the sink after installation appears on the worktop.

### Flushmount

The rim of the sink appears at exactly the same level with the worktop.

### Undermount

The rim of the sink appears underneath the worktop.

## Bending Types of Onset Sinks

### 4 Sides Down

The onset sink is formatted in a way that all four perimetric edges, are folded down.

### British Roll Front Edge

Describes the front edge of a British Onset Sink which is rounded.

### 3 Sides Down

In this case, three of the four sides are folded down and the fourth, which is located on the back edge of the sink, is folded up in order to create an upstand against the wall.

### British Square Front Edge

Is the second version of British Onset Sinks where the front edge is squared.

## Polyurethane

In order to secure weatherproofness during the installation of an inset sink, and to prevent any possible water damage to the work top, it is essential to create a watertight seal between the sink and the work surface by applying a sealant. Pyramis stainless steel sinks for inset installation are provided with a preinstalled sealant of polyurethane underneath the sink, thus, the installation of an inset sink becomes much easier and friendlier since, the sealant that is already installed provides time-saving compared to other sealing methods.

## Pyragranite Sinks

*Having established a worldwide reputation for production excellence in the stainless steel sinks sector, we have been able to utilise our long-term experience to develop alternative products to provide you with a wide range of choices.*

*Considering the rising demand of granite sinks and with the benefit of our advanced research capabilities, PYRAMIS has created an extensive range of granite sinks in a variety of colours, shapes and dimensions.*

### **The patented molding method of PYRAGRANITE sinks**

*We use an internationally patented molding method called GPS system. This method features an advanced self hardening composite material molding technology for kitchen sinks. The unique advantage of this is the even distribution of the components in the whole mass of the sink on the top, centre and bottom.*

### **Composition of PYRAGRANITE sinks**

- More than 80% Quartz (commonly known as natural granite)
- Bigger dimension of Quartz crystals diameter
- Only 20% of Acrylic, Additives and Pigments

### **Quality Systems & Certificates**

*The production of PYRAGRANITE sinks is certified according to EN 13310 European Union Norm for thermosetting composite sinks, ISO 9001 & ISO 14001.*

## The Attributes of new PYRAGRANITE range

### Durability:

#### To Thermal Shock

After 1000 repetitions in Temperature alternations it was identified that the sink did not present any change on the surface, as breaks or exfoliations.

#### To Drastic Chemical Substances

On a cleaned area of the sink a drop of a test solution was deposited and was left to act for a period of 16 hours. No chromatic change or any deterioration to the surface was present.

#### To Hot Surfaces

For around 20 minutes, a cylindrical tank at 180°C was placed on the sink and no change to the surface was noticed.

#### To Sharp Objects

Surface does not get scratched from sharp metallic objects, such as forks.

## Material Types & Colours

### Granite Type Colours

The chemical proposition derives from natural granite granules that represent almost the 80% of the mass, with the rest being colorless resin. The desired colouring of the finished product is obtained through an accurate choice of granite particles of a particular colour. It preserves the visual and texture effect of the natural stone.

### Metal Type Colours

The unique advantage of Metal sinks is that metal particles are added to the natural granite and acrylic resin composite to confer an outstanding aesthetic finish. By adding different metallic components to the composition, a number of stylish effects are achieved and all perfectly complement stainless steel appliances in the kitchen.

# Kitchen Taps

Manufactured according to the highest specifications, the new PYRAMIS kitchen taps collection is characterized by pioneering design and outstanding durability.

This new range offers you a variety of design options with a choice of materials and finishes to perfectly suit your kitchen.

## Pure Water Process

**The production method of Pyramis faucets involves an extra galvanizations process which is called Pure Water Process and prevents any leach of toxic metals as Lead and Nickel in drinking water.**

As it has been thoroughly demonstrated, Lead is toxic for ingestion: this means that the greatest risk, connected with its leaching, concerns faucets used to supply drinking water (lavatory and kitchen faucets). Nickel is a toxic metal which is responsible of many allergies caused by its contact with human skin. For this reason its leaching from all kinds of faucets could be dangerous. Due to these reasons many countries have imposed a reduction of metals leaching in drinking water to prevent chronic disease.

**The PWP treatment that is being used through the production process of Pyramis faucets consists of two steps:**

- The first step guarantees the chemical removal of Lead from the faucets, made of brass
- The second step consists of the plating with an electrochemical Nickel very hard and corrosion-proof. It contains additives which avoid the leaching of Nickel ions when pieces come in contact with drinking water.

## Features and Properties

All PYRAMIS kitchen mixer taps are manufactured according to ISO 9001:2000 and all are covered by a five year guarantee against any manufacturing defects and the non-proper operation of the valve mechanism.

All models are suitable for dynamic water pressure min=0.5 bar to max= 5.0 bar.

Each model has ceramic disc cartridges that are specially manufactured to ensure efficient function and maintain longevity.

# Cookerhoods

*The wide range of Pyramis Cookerhoods, with different designs and styles, offers limitless choices to those who seek superior quality and powerful performance.*

*The models feature clean lines, classy curves and carefully chosen materials, which combined with the advanced extraction levels and high efficiency, ensure a clean and odor-free environment.*

# Characteristics

## Peripheral Absorption

Available in selected models both in the Elegant and the Premium series. Peripheral absorption produces an increasing air speed that reduces the leakage of odours outside the extraction perimeter of the hood.

## Halogen lamps

All models of the Elegant & Premium series feature halogen lamps, which are encased in a glass cover (not in a plastic cover which is sensitive to temperature and age alteration).

## Touch controls, electronic and sliding buttons.

Dependent on your choice of hood, the controls are designed to be easy to use and add to the overall aesthetics, whether in our high-end or more basic models.

## Clean Air Function

Available in all models of the Elegant and Premium series. This useful function refreshes the air automatically, when switched off. For ten minutes every hour, the hood will activate at speed level 1. Following the 10-minute operation, the motor will automatically de-activate and a LED display button will remain on until the process repeats. By pressing any key, other than the hood light, the hood will immediately resume its normal function.

## Carbon filters

Carbon filters bind any substances in the absorbed air before it is then extracted or re-circulated. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned. They cannot be cleaned or repaired, they can only be replaced when necessary.

## Intensive function

Available in all models of the Elegant and Premium series. The intensive function offers a fourth, stronger speed, for 10 minutes. By pressing the relevant (to the model) button for two seconds, the intensive function will be activated. At the end of the activation period, the hood automatically resumes its initial speed. If the function needs to be interrupted within the ten-minute timeframe, the button just needs to be pressed again.

## Metal filters

Metal filters have two functions: they protect the inner parts of the cooker hood by preventing the absorbed grease and fumes from harming the fan or the motor and they add to the aesthetics of the cooker hood. They are easy to remove from their casings and can be washed by hand, or in the dishwasher (recommended).

# Ovens

Pyramis Ovens, exceed the highest expectations in technological performance, design and quality. Their multiple functions and innovative features respond perfectly to the commands of contemporary "homing" and "cocooning".

Their high aesthetics reflect the stylish demands of every modern kitchen. Their robustness and endurance guarantees an excellent attribution even to the most demanding cooking ventures and use. Pyramis upgraded oven range qualifies the highest standards of the industry as well as of every home kitchen in the world.

## Functions

Food warmer

Automatic program for cooking pizza

Automatic program for toasting bread

Automatic program for cooking roast chicken

Warning indicator when the oven light is on

Quick defrost

Delicate defrost

Top and bottom heat

Top heat

Bottom heat

Fan & circular heating element

Top heating, fan & circular heating element

Bottom heating, fan & circular heating element

**Gratin**

Gratin: combination of mild grilling (1200W) with an intermittent fan. The fan is on for 30 seconds and then off for another 30 seconds. So you can have dishes that are crispy on the top and cooked normally inside.

Top & bottom heating and fan

# Characteristics

**Push-pull buttons**  
For greater safety.

**Touch controls**  
The new touch control panel is very easy to use and only a light touch is enough for its activation.

**Accessories & Fittings**  
Telescopic runners, side racks, trays and grids that help make cooking easier.

**Triple or double glass doors with removable inner glass.**  
The new triple or double glass doors are designed to ensure absolute heat isolation and therefore better energy and cost efficiency. The inner crystal is full glass and can be easily removed and cleaned.

**Digital Auto Programmer**  
This programmer allows the oven to turn on and off automatically. It is fitted with clock, timer and child lock.

**Anti-Spot Treatment**  
A special coat on the stainless steel and glass parts of the ovens that keeps the safety glass, handles and stainless steel frames spotlessly clean.

**Cooling Fan**  
All Pyramis ovens have a cooling fan system which cools the outer part of the oven while cooking.

**True Fan**  
True Fan is a new system which enables better circulation of hot air within the oven so that the desired temperature is reached more rapidly thus saving energy. Time taken to cook multiple dishes on different shelf levels is now the same as cooking a single dish on a single shelf with True Fan cooking.

**Minute Minder**  
This useful mechanical device alerts the user to the end of cooking time without switching off the oven.

**Digital end-cooking programmer**  
It allows the ovens to switch off at the pre-set desired time. It includes clock, timer and child lock.

**Easy to Clean**  
A special formula on the inner cavity of the oven prevents any food splatters from sticking and therefore they can be easily removed.

**Analogue clock with end-cooking programmer**  
An analogue clock which can be preset to switch off cooking.

**Energy class A**  
All PYRAMIS ovens (except 90cm oven, gas oven & 145 set) feature A-ratings for energy efficiency.

**The most advanced kitchen technology... at your services!**

The new PYRAMIS oven with TFT touch control screen offers 24 program functions, so that you can easily create and enjoy delicious dishes. These 24 functions include 14 basic programs as well as:

**5 automatic pre-selected programs:**

You can choose among roast chicken, roast, pizza, cake and toasted bread what you wish to bake and the oven has the according program function to execute perfectly your order.

**5 specialized functions**

**Yogurt & Yeast:** a special climate zone that offers the ideal environment with the proper temperature for the making of home made yogurt and yeast.

**Keep Warm:** a temperature of 80oC, keeps the food warm and tasty until serving.

**Plate Warming:** a tasteful dish must always be served in warm plates preheated in 65oC.

**Defrost:** for defrosting frozen food in the most healthy way.

**Adjusting in your needs:**

You can choose the weight of your chicken or roast meat or choose how well done you would like your toasted bread. The oven will adjust its program functions accordingly in order to achieve successfully your desired cooking standards.

# Hobs

Pyramis Hobs are distinguished for their supreme performance and attractive aesthetics, at all levels. A great variety of designs, types and functions ensures the stylish, practical and quality use of the hobs, either ceramic, induction or gas.

Their advanced technology combines innovation with long-term experience in manufacturing and delivers a product range which serves the demands of the contemporary kitchen.

## Functions

### Timer

An electronic timer enables you to select a pre-set cooking time. When the time is up, the hob automatically switches off.

### Residual heat indicator

A red digital indicator that warns that the hob is still hot.

### Touch controls

The modern touch control panel is very easy to use and reacts even in to slightest touch.

### Safety lock

All hob functions can be locked to ensure that no power is supplied to the hob. The function is activated by pressing the lock button for 3 consecutive seconds.

### O.S.D.

The Overflow Safety Device locks and switches the hob off, if any fluids should overflow on to the hob's surface.

### Rheostatic touch sensor (slider)

For easier and more accurate selection of the desired cooking temperature level.

## Characteristics

### Beveled Hobs

In beveled hobs, the design keeps up with the technological advancement, offering a frameless option of high aesthetics.

### New inox frame

Its flat design is perfectly combined with the minimal aesthetics of the Pyramis hobs. It applies perfectly on the kitchen worktop and contributes to the style of the Pyramis stainless steel sink, oven, cooker hood and refrigerator.

### Rheostatic touch sensor (slider)

Slider touch control is the most advanced hob control system in the Pyramis range. It offers the opportunity to choose easily and quickly the desired cooking level, with just one touch.

### Hob Scraper

It is included in most Pyramis hobs and it makes their cleaning much more simple.

**030094401**

## Induction Hob

The induction hob is based on the natural phenomenon of induction, which converts electromagnetic energy into heat. When an electric current is activated, inductors beneath the hob's surface react when a ferrous pan is situated above. The heat is produced directly into the cookware, while the ceramic surface of the induction hob remains cool.

Thus the boiling time can be reduced up to 50% in comparison to conventional electro-ceramic hobs and therefore cost and energy can be satisfactorily saved. Also, induction hobs are very easy to clean because any food splatters never burn on to the cool surface, so are very simply wiped off.

### Faster

The heat is delivered directly into the cookware without wasting time in heating the ceramic surface of the hob first. Cooking time is satisfactorily reduced.

### More cost effective

90% of the absorbed energy is converted into heat directly on the cookware. As soon as the cookware is drawn away the conversion stops immediately without any energy wastage.

### Safer

The heat is produced only if ferrous metallic cookware is placed on the hob. So the surrounding temperature of the ceramic hob remains low, thus avoiding accidents or burns.

### Smarter

The induction hob automatically adjusts the amount of energy required to the diameter of the cookware. Because less energy is used for a small pan than for a larger frying pan, the hob is smarter and more efficient.

# Dishwashers

*The advanced technology and supreme effectiveness of Pyramis dishwashers ensures that every model delivers maximum performance using the minimum consumption levels.*

*Fully electronic and easy to use, Pyramis dishwashers feature up to 10 programs that will safely and responsibly clean glasses, plates and pans, whether they are lightly soiled or require more intensive cleaning.*

*Fully electronic and easy to use, PYRAMIS dishwashers feature up to 10 programs that will safely and responsibly clean glasses, plates and pans, whether they are lightly soiled or require more intensive cleaning.*

# Characteristics

### Basket with adjustable sections

The pull-out baskets are on telescopic runners, making them easy to use pull-out while firmly in place. Further adjustable glass and plate supports provide absolute flexibility when filing the dishwasher with plates and cookware.

### Multiple choice of detergent

All PYRAMIS dishwashers can accommodate all types of tablets or dust detergent for superior washing results.

### Aqua Stop System

This protects your machine from leakages of water or damages to the interior pipes. Especially necessary in built-in models in order to secure your kitchen from flooding.

### Upper basket adjustable in height

The upper basket can be adjusted in height, even when fully loaded, in order to accommodate larger plates or pans in the lower basket.

# Freezers - Refrigerators

*Pyramis Refrigerators define elegance and technological advancement in the kitchen. With absolute respect to the environment, they offer superior cooling and freezing performance while they respond immaculately to the demands of the contemporary way of living.*

*Their stainless steel surfaces, enlarged capacities and lowest energy consumption are only some of their attributes that indicate their excellent quality, ergonomic functionality and modern design.*

## Functions

### **Freezer and refrigerator thermostats**

*The temperature inside the freezer and the refrigerator compartments is very easy to control simply by adjusting the relevant thermostat at the desired level from 1-5. For the most efficient function of the fridge it is suggested to use levels 2-4 according to seasonal variations and your requirements.*

### **No Frost**

*NO FROST technology saves time as you never need to manually defrost your fridge. Defrosting takes place automatically through the constant circulation of cold air, inside the freezer and the refrigerator compartment. In this way the humidity is kept in the ideal level for food preservation.*

# Characteristics

## Climatic Class

From Subnormal (100-320 F) to Tropical (180-320 F). All models provide the appropriate class for Continental or standard Northern climates. Selected models are equipped with a wider range of classes, covering a broader range of temperatures.

## Quality standards

All models are provided with steel panels and are electrostatically painted to remain unaltered. Insulation materials and removable shelves provide maximum and flexible storage space.

## Odor and humidity control filter

It keeps unpleasant odors from spreading inside the refrigerator while it keeps the humidity in the ideal level.

## Standard Characteristics

Accessories are provided as standard for all models: a kit for adjusting the door opening, hinges, food containers, spatula and ice box.

## Stainless Steel Door

All PYRAMIS refrigerators have stainless steel doors which offer great aesthetics and long-term durability. The stainless steel doors are anti-spot treated to ensure they remain stainless during everyday use.

## Environmentally safe

The coolant used in PYRAMIS refrigerators is isobutane (R 600a). The refrigerant gas includes no harmful chemicals and is free of CFC.

## Energy Efficiency Class A & A+

All PYRAMIS cooling products are A or A+ rated for energy according to European Union directives.

## Silent function

All PYRAMIS refrigerators have a maximum noise level of 44db, which ensures your kitchen is always peaceful.

## Freezer and Refrigerator thermostat

It is possible to manually adjust the inner temperature of the refrigerator and freezer compartments according to your preference and needs.

## Icematic

This function allows you to have ready-made ice-cubes, simply by emptying the iceboxes into the special drawer with a rotational movement.

## Compartment 0° C

This compartment ensures the temperature remains constant at 0°C, for perfect preservation of meat, fish and other sensitive food.

## Vegetable drawer

For easy and effective storage of fresh fruit and vegetables.

## Bottle holder

A practical solution to keep your bottles from sliding when opening or closing the refrigerator's door.

## Function light indicators

They confirm the effective function of the cooling product.

**Energy efficiency class A & A+**  
For better energy and cost efficiency.

## Electronic display

For easier setting and observing, the ideal temperature inside the refrigerator, in order to make sure that your food is freshly preserved for longer time.

## Stainless Steel handles

They add to the style and aesthetics of the refrigerator while they offer immaculate resistance and stability through time.

# Minikitchens-Pantries

Pyramis Minikitchens are compact kitchen units that provide all the advantages of a fully integrated and practical kitchen; just on a smaller scale. They offer the ideal solution for offices, holiday homes, dormitories, rented rooms and studio apartments.

Pyramis Minikitchens incorporate a PYRAMIS 18/10 stainless steel sink, built-in hobs, a refrigerator with a 4\* freezer and a wooden or metallic storage cabinet. They are designed for absolute space effectiveness and are made using quality materials with a CE certification.

## Minikitchens

### Switches

Very easy to use and to clean.

### Hobs

The PYRAMIS Minikitchen is offered with electric, ceramic or gas hobs.

### Fridge-Freezer

A quality 4 star refrigerator at 220V, with 50Hz frequency and 140 litre capacity. It has adjustable shelves and automatic defrost in the refrigerator compartment.

### Pantry

High tech 18/10 stainless steel sink, with bowl and a drainer and 2 hobs.

PANTRY 1B 1D WITH 2 UNEQUAL EL. HOBS 100X60X5,5cm

Pantry Dimensions: 1000 x 600 x 55mm  
 Bowl Dimensions: 340 x 400 x 150mm  
 Minimum Base Unit: 45cm

Finish	Ar. Number	Bowl Position	Waste	Packaging
SMOOTH	140113903	Reversible	Ø60mm	Sleeve

**Built-In Hobs**

- 1 Rapid cooking plate 145mm, 1500W
- 1 Normal cooking plate 180mm, 1500W
- Ready to plug in
- Silicon safety cable
- Function light indicator
- 2 Switches of 7 levels

**Accessories**

**4 Sides Down**
